

LYNIATE ENVOY

Notes

- 1 Pull Option:** FHIR or proprietary REST APIs.
- 2 Pull Option:** Lyniate Envoy's response is shared.
- 1 Push Option:** A standards-based option such as HL7 v2, XML CDA, DICOM, X12 or a non-standard option such as SFTP. Most partners prefer to provide Lyniate with an API to use.
- 2 Push Option:** For writing data to the EHR, Lyniate will expose a REST API to call over HTTPS. *If using HL7 from the Health System to Lyniate, a secure connection (e.g., VPN) is established.*

Benefits of Lyniate managed service

- Compliant platform
- Any-to-any health data integration
- Normalization of data structure into consistent data model
- Dedicated insistence per customer, with high availability infrastructure

Are you looking to take the stress out of your EHR integration?

Let's talk.
